

AETM is an international forum for the presentation of technological advances and research results in a range of fields in Science, Engineering, Technology and Management. The objective of the conference is to bring together leading researchers, engineers and scientists in the domain of interest from around the world. This conference will provide an effective platform that provides opportunities for researchers, academicians, technocrats and entrepreneurs to join together and receive comprehensive feedback through face-to-face exchanges on the latest developments and to set up contact with professionals and institutions from other countries.

Cosmic Journals Group is the leading gateway to a family of journals that offer an international platform to exhibit the skills of researchers, scientists, engineers, doctors, managers, professionals, academicians and professors. Through these peer-reviewed open access online journals worldwide research community gets the chance to communicate and synchronize their research activities leading to growth and application of research and technology.

Cosmic Journals Group are the medium to discover the basic blocks of the latest research. The journals publish original theoretical research work and application based studies, either as full length articles or short communications, technical articles, review articles, special reports and letters to the editor, which contribute to a better understanding of engineering, science and technological challenges and their respective solutions. By gaining the knowledge of present findings, the students and researchers can make significant contributions to their areas of research.

The infographic displays the impact factors of various journals across different categories and years. The journals are arranged in rows, with their respective impact factors and evaluation scores displayed in circular or oval frames. The categories are labeled as IJCS, IJEC, IJMS, and IJRMET.
